

What's **BIOTEK** about?

Biotek is a range specifically for carwashes equipped with a water recycling unit. Environmental legislations become more and more demanding and therefore the monitoring of the water consumption and verifying the water quality will be a daily routine in the nearest future, important for all car- & truck wash owners.

To assist you in this wastewater management, Kenotek offers you Biotek! Specialized carwash chemicals that offers the solution for carwashes equipped with water recycling units that have a bad smell or malfunctional water recycling unit. These new products combine more than 25 years of expertise in micro-biology, carwash chemicals and high-end R&D in the lab and on the field. By changing the wastewater bacteriology and the composition of the used chemicals, many recycling water problems can be avoided or solved.

With Biotek we succeeded to suppress the bacteria responsible for causing bad odours in water recycling units. While keeping an even stimulating bacteriology that helps water purification in a positive way. The chemical composition of our washing and waxing chemicals is of utmost importance to keep bacteriological balance. Therefore a precise selection of suitable raw materials is crucial. Summarized: with Biotek, CID LINES succeeded in creating a high qualitative product range with a perfect balance between good bacteriology, chemicals and efficiency.

The three pillars:

BIOLOGICAL

To get the full profit out of your water recycling unit we want to optimize the biology in the waste water. This by supporting the water recycling system with a micro biology booster and offering clean products with a unique composition and easily biodegradable.

TECHNICAL

Our trained staff knows the technical functionalities of a carwash system and its water recycling unit. With this knowledge they can improve the quality of your waste water and show how to obtain the most optimized results out of your water reduction investment.

CHEMICAL

Our R&D-department developed formulations to offer you a complete range of products. From prewash to the waxes, Biotek will get the job done in the most water recycling friendly way. Biotek brings you a pleasantly fragranced work environment and a fine experience for your customers.

Keep your carwash pure and fresh!

- ✔ restore the biological balance
- ✔ save money, water, time and energy
- ✔ improved biodegradability of the chemicals
- ✔ intense fragrance
- ✔ removes bad odors
- ✔ clarifies recycling water
- ✔ optimisation of the water recycling unit
- ✔ premium washing results

KENOTEK

Creating that clean, new, protective sensation at every wash is the very core of our profession. That's why we create products for every step in the washing process and every situation. Magic happens when our chemicals touch the bodywork of the vehicle. Premium quality products backed by far reaching service and continuous support create a sensational return on investment for our partners worldwide. Water test

Recycling water often has an unwanted dark color and unpleasant smell. These inconveniences can be caused by many things; overloading the system with dirt, the wrong choice of chemicals, a lack of oxygen or an undersized recycling set-up.

Dirty recycled water means dirt coming back to your carwash, causing blocked nozzles, dirt deposits on washing materials, walls, floors and constructions, etc. A bad smell of the water, gives an unwanted negative experience for the customers visiting your carwash.

With Biotek we can help you on a relatively short time, to overcome these problems.

BIOTEK product range

The well balanced composition of the Biotek product range makes it perfectly suitable for use in washing plants equipped with a water recycling unit.

WATER RECYCLING UNIT

BIOTEK START

Additive to be dosed in the water recycling system

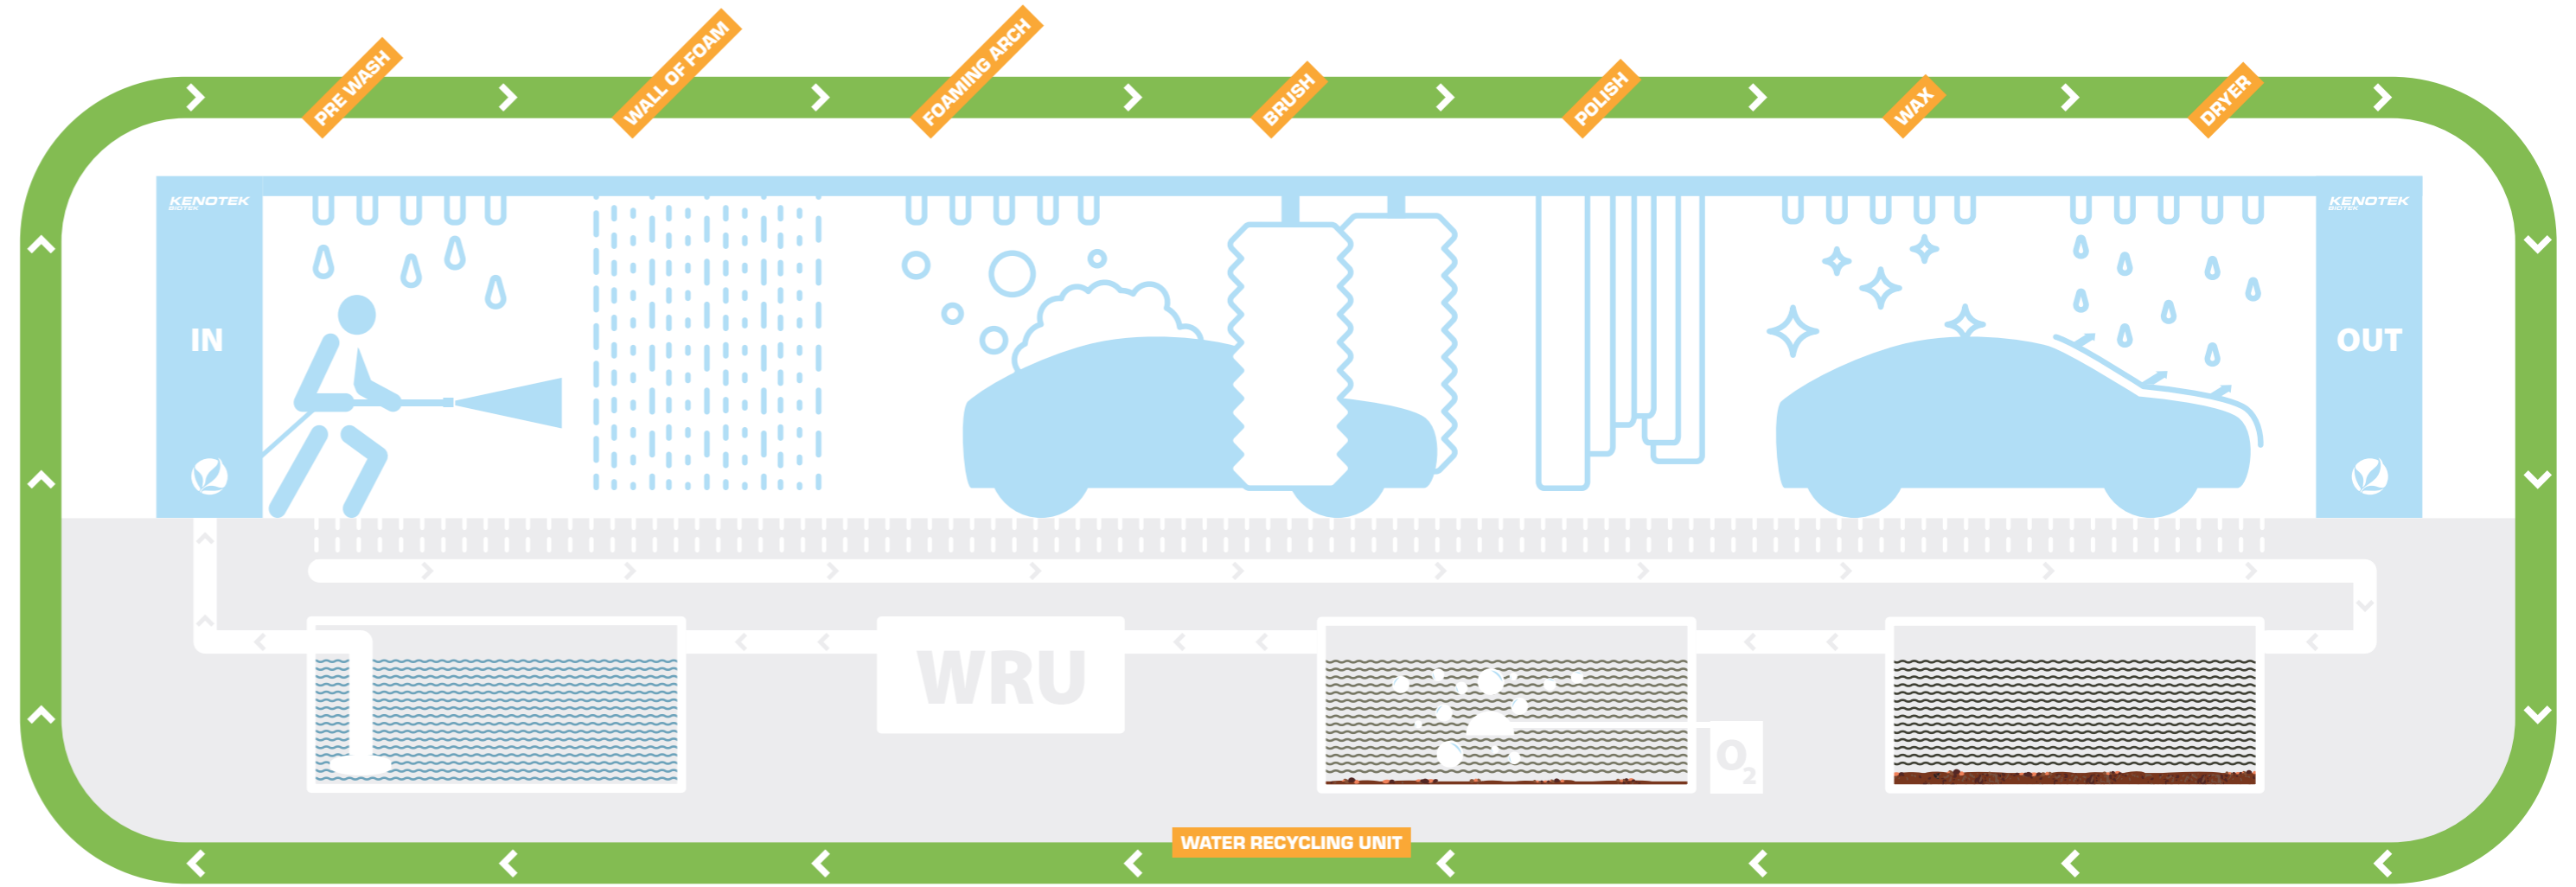

- suppresses bad odours in water reclaim systems
- effective within 2 to 4 days
- easy to dose when starting up with the Biotek products

BIOTEK BOOSTER

Additive to be dosed in the water recycling system

- brings problematic water reclaim systems back in balance
- adds microbiology into the water recycling unit
- clarifies recycling water

PRE WASH

BIOTEK PREWASH

Concentrated, alkaline prewash

- powerful but safe: VDA "A"- Class approved
- nice, freshly fragranced

BIOTEK ALU CLEAN

Concentrated, acidic wheel cleaner

- removes efficiently and fast, the most stubborn brake dust from wheels
- non-toxic

BIOTEK WHEEL CLEANER

Concentrated, alkaline wheel cleaner

- removes efficiently and fast the combined dirt film composed of oils and brake dust on wheels

WALL OF FOAM

BIOTEK SUPER FOAM

Concentrated polish-shampoo

- very strong foaming action, suitable for use on lava-arches
- keeps washing materials, constructions and hall longer clean, compared to conventional products
- neutralises bad smells
- nice, freshly fragranced

FOAMING ARCH

BIOTEK SHAMPOO

Concentrated machine shampoo

- strong foaming action
- neutralizes pH on the vehicle
- keeps washing materials, constructions and hall longer clean, compared to conventional products
- neutralises bad smells
- nice, freshly fragranced
- balances pH in the water recycling unit

POLISH

BIOTEK FOAM POLISH

Concentrated foam polish

- good foaming action
- gloss enhancing effect
- long lasting and deep gloss
- nice, freshly fragranced
- gives an added-value to your wash programs

WAX

BIOTEK WAX

Concentrated wax

- gives an outstanding gloss and protection to the paintwork and plastics of a car
- suitable for use in hard and soft water
- good results, even at a high washing speed

DRYER

BIOTEK DRYER

Concentrated gloss dryer

- gives a long remaining, mirror glaze to the paintwork
- suitable for use in hard and soft water
- good results, even at a high washing speed
- hydrophobic effect on the car
- avoids microdrops

Recycled water

With the Biotek range we succeeded to suppress bacteriology responsible for causing bad odours in water recycling systems. A perfect balance between good bacteriology, chemicals and efficiency while keeping and even stimulating bacteriology that helps water purification in a positive way.
