

PRODUCTS

Kenopure™

Pure Preparation

- cleaning & disinfecting
- skin conditioning
- versatile use
- Ideal foam consistency in combination with The Pure Foamer

Kickstart

Kills microbes in seconds!

- very fast action
- approved for organic farming

Kenolac™

Organic power

- based on lactic acid 3,6%
- available as dip or spray
- possible to be applied on organic farms

Kenomix™

Just shake it!

- ultimate disinfection
- very low consumption
- spectacular color
- gentle on the skin
- long-lasting stability

Long lasting stability
= Long lasting activity

DOWNLOAD the Mastitis Cost Calculator APP for iOS & Android

CID LINES has developed a tool, the mastitis cost calculator, to determine precisely and specifically the cost of mastitis on farm level. Enter the number of clinical cases per month, the level of somatic cell count, the production level, the price of the milk and you'll obtain the cost of mastitis for your herd.

Use biocides with precaution. Before any use, read the label and the information concerning the product. This product is not necessary available or registered in every country.

CID LINES

**WE
MAKE
HYGIENE
WORK**

Hygiene is health. Hygiene makes all the difference in the food chain, from farm to fork. At CID LINES we make hygiene work. We combine 360° solutions with tailored advice. We go for the highest service levels and we invest in continuous innovation. This way we help our partners focus on what's key: keeping their business profitable, sustainable and most of all healthy. Because hygiene is health and health means greater wellbeing for all.

PRE-DIP

The Pure Foamer

Helps to remove mastitis causing bacteria

2 big categories of bacteria causing mastitis; contagious environmental bacteria. The pure foamer **reduces the environmental bacteria**. Environmental bacteria are coming from the manure, the ground, the bedding, water, For example *E. coli*, *Klebsiella spp.*, *Streptococcus uberis*, Transmission of these bacteria goes very easy and fast by dirt on the teats, entry by projection during milking, entry when the teat canal is open during the dry period, These bacteria are giving most of the time clinical infections. (red udder, inflammation, fever, ...).

Cleaning and stimulation

A good foam consistency and skin conditioning gives a good coverage. That means an **easier and better cleaning of the teats**.

Using the pure foamer allows to optimize the milking routine in order to obtain a good stimulation. A good udder stimulation takes 60 – 90 seconds. It is a preparation that allows to foam and clean the teat with adequate teat massage to stimulate milk let down.

Faster milking

A good stimulation means a **shorter milking time** and a **higher milk production**.

POST-DIP

The Pure Dipper

Homogeneous dip & good coverage

No longer cup “squeezing” needed. We can guarantee a better homogeneity of the product with the pure dipper and therefore a better coverage of the teats. This means a better skin and teat-end condition and less risk for mastitis.

Useful for all types of teats

Long, short, thin, thick, ... every shape is possible!

Helps to prevent contamination of the teats with mastitis causing bacteria, both contagious and environmental bacteria

By dipping the teats after milking you help the teat-ends physically close, that means **less chance for environmental bacteria** to enter the teat canal and thanks to disinfection **less risk for contamination with contagious bacteria** from the liners.

Centralized dosing

Only one drum needed in a central room, **no more dip-cup filling during the milking**.

Easy access to the 4 teats thanks to the length of the gun

- Easier to dip the 4 teats
- Safer to dip
- Less consumption of the product
- Less spillage of the product, thanks to the special head design

CLUSTER DISINFECTION

The Pure Sprayer

Helps to prevent contamination with contagious mastitis causing bacteria by clusters

- **Liner disinfection**
- Possible to use selective/individual

Clean/fresh solution every time

Hoof hygiene

- Possible to use selective/individual
- When the cows are **in the milking parlour**
