

Product protocol

Kenomix™

STEP 1

Add the activator to the product, Mix the product during 5 min, turn upside down and shake well. Wait 1 hour before use.

STEP 2

Dip the whole length of the teats. The teat dip disinfects and conditions the teat skin.

STEP 3

Cow is protected until next milking time. Additional hygiene practice: avoid cow lying on the floor immediately after milking.

MATERIAL

- Kenomix™
- Dip Cup or Pure Dipper

Kenomix™

TEAT SKIN EVALUATION SCORES

SCORE 1
Teat skin is smooth, free from scales, cracks or chapping.

SCORE 2
Teat skin shows some evidence of scaling.

SCORE 3
Teat skin is chapped. Some small warts may be present.

SCORE 4
Teat skin is chapped and cracked. Redness, indicating inflammation is present. Numerous warts may be present.

TEAT END EVALUATION SCORES

SCORE 1
Teat end sphincter is smooth, with no evidence of irritation.

SCORE 2
Teat end has a raised ring.

SCORE 3
Teat end sphincter is roughened with slight cracks, but no redness is present.

SCORE 4
Teat end sphincter is inverted with many cracks, giving a "flowered" appearance. Teat end may have old but healing scabs.
