

Product protocol

Kenopure™

STEP 1

Stripping: remove foremilk, which contains bacteria in the teat canal into the cup.

STEP 2

Dip teats with the foaming dip cup or Pure foamer. Kenopure cleans and disinfects at the same time.

STEP 3

After 30 sec. contact time, dry the teats with a clean paper towel (one per cow).

MATERIAL

- 40% Kenopure™
