

## Kenotek Anti Insect

The start of spring means the revival of insects! These end up on the bodywork and the windshield of your car and are not always easy to remove. Sun baked insects are very difficult to remove, so Kenotek Anti Insect is a very welcome product for every car enthusiast's collection of car care products.

The formula has been specifically developed to break down proteins and contains no corrosive soda. It is therefore safe on all paintwork. Not removing insects from your car can lead to damages on the paintwork, remove insect stains as soon as possible.

But how does it work? Kenotek Anti Insect is ready to use! You just need to spray it and spread it evenly over the surface. Let the Anti Insect soak in and rinse well.
