

## Acid cleaning and descaling CIP product

### Product Description

Pho Cid is an acid cleaning product for the decalcification and the removal of persistent protein and iron deposits.

### Properties

The combination of acids effectively removes calcium and persistent proteins.  
Pho Cid can be used for CIP installations and crate washing machines.  
Pho Cid is suitable for periodic descaling or daily acid cleaning.

### Direction of use

Pre-rinse with water.  
Circulate a Pho Cid solution of 0,5-2% at 40°C-70°C for 8-15 minutes.  
Rinse with potable water.

### Specifications

Physical state	Liquid
Colour	Colourless
pH	ca 2 (1%)
Freezing point	-10 °C
Boiling point	100 °C
Relative density	ca 1.22
Solubility in water	100 %

### Storage and Disposal

Keep only in the original container in a cool, well ventilated place. Keep container closed when not in use.  
Do not store in corrodable metal. Dispose in a safe manner in accordance with local/national regulations.

### Safety instructions for the user

Avoid contact between alkaline and acid products.  
Always test the product first on a small surface.  
Consult your Cid Lines sales' person for a suitable cleaning- and disinfecting program that is adjusted according to the contamination and the specific conditions of the company.

Before use, please check the MSDS.

Not all CID LINES products are available in all countries. For information about availability of a specific product, please contact your CID LINES dealer.
